# CLEAN ENERGY FOR ETERNITY

---

## **SIGN OF A CLEANER WORLD** **12 Noon Sunday 8 OCTOBER 2006**

COMMONWEALTH PLACE CANBERRA  
Between the National Library and High Court  
[www.cleanenergyforeternity.net](http://www.cleanenergyforeternity.net)

**Climate change will affect us all.  
However, there is still time to tackle our energy consumption.  
Together we can do it. *Your* part is very important!**

Australia has the highest level of Greenhouse Gas emissions per capita in the world. It is time to switch to Clean Energy and make our contribution to reducing Greenhouse Gas Emissions. The solutions exist and it's not too late to make a difference.

Be part of thousands of people who will gather and send the message that, together we can and *will* address climate change.

**Organisations to meet & gather at 10.30 a.m to form Human Sign at 12 Noon.**

We believe we can turn the problem of climate change around and it will ***be your voice – the voice of all of us*** – that will make all the difference to how we make and use energy.

We are expecting a sizeable turnout on the day with a big media presence and are asking for the support of prominent community organisations, such as yours, to help get the message across.

### **CLEAN ENERGY NOW**

**Climate change and clean energy experts will speak and answer *your* questions.**

If your organization would like to attend and / or have an active role in the ***Clean Energy for Eternity Day*** in Canberra, please contact us! Children are welcome. Musicians and street performers to register their interest to perform on the day. If you would like to pool transport, please register on the website.
